

EIBraille 40 V

Portable Braille Solution

**The future of notetakers -
Portable Windows® 10 with
JAWS® and Braille**

EIBraille 40 V is a Windows 10 PC with JAWS that docks to your Focus 40 Blue 5th generation Braille Display to provide the ultimate in portable productivity.

Students and professionals alike will appreciate accessing the same Office® suite and popular third-party applications their peers are using.

EIBraille and Focus Blue 5th Generation offers advanced Scratchpad notetaking combined with support for all of your preferred Windows 10 applications.

The EIBraille 40 V is so much more than a proprietary notetaker. Teachers already understand commonalities like file manager and word processing on a Windows system, and work done on the EIBraille can be transferred seamlessly with no loss of formatting. The EIBraille allows the student to continue using and improving on Braille on a Windows 10 based computer.
