

See new possibilities

The best enhanced vision device is ready for life on the go

Life-changing technology, eSight enables people with low vision or legal blindness to achieve up to 20/20 vision. eSight stimulates synaptic nerve activity to increase visual information to the brain. Clinically-proven, eSight is used by thousands of people with macular degeneration, diabetic retinopathy, Stargardt's disease and more.

eSight 4

Empowering People with Low Vision

Advance in school

"eSight has dramatically improved my educational experience. I passed my first semester of college, and without eSight, I have no idea how I would have done it." - Jesse, Age 21

Return to work

"In addition to taking care of my family, I work full-time and independently do all the things most people take for granted." - Yvonne, Age 34

See new possibilities

"I can remember the first time I saw my wife's face. I'll never forget that day, and how that day changed the course of the rest of my life." - Gary, Age 62

"eSight removes the traditional barriers people living with low vision face. Significantly enhancing sight while retaining mobility, eSight makes it possible for people with legal blindness to advance in all levels of school, achieve their professional goals, and more easily participate in society."

Dr. Scott Gartner, Low Vision Specialist, Lighthouses for the Blind, Palm Beaches and Miami

The Clinically Validated Approach

The eSight Quality of Life and Efficacy Study (eQUEST, ClinicalTrials.gov Identifier NCT02616900) consists of six independent clinical studies conducted at world-renowned low vision research institutions. Published in the Journal of Optometry and Vision Science, the study demonstrated significant improvement when using the low vision aid including:

**A seven-line gain
in distance acuity**

**100% mobility
retention**

**12 letter contrast
improvement**

**Significant increase
in facial recognition**

"eSight provides unprecedented improvement in a number of visual performance measures. This device has a substantial impact on the lives of many people with severe vision loss."

*Dr. Gislin Dagnelie,
MS, John Hopkins
MedicineHealth Network*

The vision to do more

Our mission is to help people living with visual impairments to See New Possibilities. eSight has been recognized for pushing the boundaries of vision technology from Health Tech's Best Wearable Technology, and Time Magazine's Best New Inventions. Today, eSight has more than 60 patent filings, with 30 issued patents.
