

# MagniLink Vision

**You  
decide!**  
– choose a unit  
with or without  
Text To Speech  
function.

MagniLink Vision is a video magnifier that offers users with visual impairments all the functions they need at an attractive price. It's a modern, flexible video magnifier with an ergonomic and user-friendly design.

## Plug & play

Connect MagniLink Vision to a power socket, press the on/off button and you're ready to start using your video magnifier!

## Easy for all

MagniLink Vision is very easy to use, which makes it very popular among elderly users as well.

The control buttons are tactile and ergonomically placed directly on the integrated LVI monitor. The high-quality monitor is low vision-adapted with high brightness as well as good contrast and color reproduction. The surface of the monitor is matt to avoid reflections.

The high-quality reading table has friction brakes in the X and Y axis. The brakes can be used to provide higher resistance when the reading table is moved sideways and/or forwards/backwards. They can also be used to lock the reading table during transportation.

## MagniLink Vision TTS

The Text To Speech option offers the best of both worlds – a high-quality reading camera and reading machine in one single product, resulting in increased reading speed, reading durability and a more relaxed reading experience. With Full HD the unit offers an even lower initial magnification, providing a better overview of the materials to be scanned and OCR processed with the TTS, Text To Speech feature. Please note that TTS must be delivered from the start.

## Useful features with TTS

- Read a full US Letter page
- Possible to open/save text on a USB
- Reads misaligned documents
- Automatic language detection
- Adjustable size, color and font
- Listen to the text through built-in speakers or plug in headphones

### Included:

Reading camera with a reading table and monitor, polishing cloth, user guide and power adapter.

If you have ordered a unit with TTS, you will also get a hand control.
