

# Prodigi software

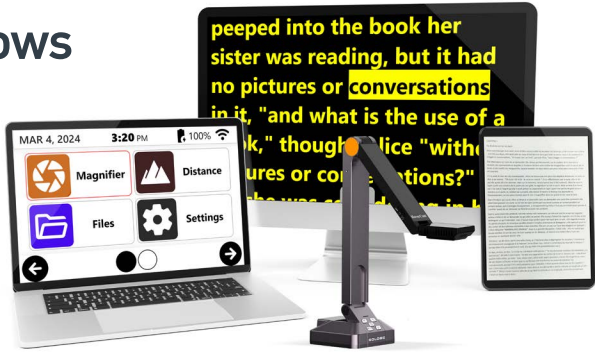

powered by Humanware

Prodigi for Windows is a revolutionary software designed to enhance the learning and working experience for people with low vision.

Available in three configurations, Prodigi offers a comprehensive suite of tools tailored to the needs of educators, students, and working professionals alike.

## Introducing Prodigi software for Windows

Transforming the educational environment for students and teachers concerned with low vision. Enhancing the performance of professionals with vision loss.

### Key features

- Enhanced accessibility features, including magnification, optical character recognition, text-to-speech and adjustable reading modes, to make content more accessible.
- Integration with the HoverCam Solo 8 Plus document camera for optimized magnification and text capture.
- Seamless compatibility with Windows-based devices, allowing users to bring their own devices and document cameras.

## Flexible configurations

### Prodigy software only

The base software package provides essential accessibility features to enhance content accessibility.

### Prodigy Starter Kit

Includes the Prodigy software, HoverCam Solo 8 Plus document camera, Microsoft Adaptive Kit, and a carry case.

### Prodigy Complete Kit

Adds a Surface Pro tablet, wireless keyboard and mouse, and a 6-in-1 USB hub adapter to the Starter Kit.

## Value in education

- Empowers educators with innovative tools to create an inclusive learning environment.
- Enhances the learning experience for students by providing access to content in an accessible format.
- Enables schools to leverage existing Windows-based devices and document cameras, reducing the need for additional hardware.

## Prodigy software: Seeing big, achieving more.

Boost learning and professional performance with our cutting-edge low vision tools.
